

UNIVERSITY RESIDENTIAL SERVICES AND CAMPUS FACILITIES HANDBOOK ACADEMIC YEAR 2025-2026

SECTION 1: INTRODUCTION TO ON-CAMPUS LIVING The university provides a comprehensive range of living options designed to create a safe, supportive, and inclusive community for all students. Living on campus is more than just having a place to sleep; it is an opportunity to immerse oneself fully in university life. The residential services department manages over four thousand beds across ten different halls of residence. The goal is to provide high-quality accommodation that fosters personal growth and academic success. Every hall is situated within a short walking distance of the main academic buildings, ensuring that students have easy access to classes and support services.

SECTION 2: TYPES OF ACCOMMODATION There are several distinct types of accommodation available to suit different budgets and lifestyle preferences. Allocations are generally made on a first-come, first-served basis, with priority given to first-year undergraduate students and international students.

The primary categories of rooms include:

1. **Standard Single Rooms:** These units provide a private bedroom with a shared bathroom and kitchen facilities. This is the most common option and offers a balance between privacy and social interaction.
2. **En-suite Rooms:** These units feature a private bedroom with an attached private bathroom. The kitchen and living areas are shared with five to six other students in a cluster flat arrangement.
3. **Studio Apartments:** Designed for senior students or postgraduates, these self-contained units include a private bathroom and a small kitchenette within the room.
4. **Shared Twin Rooms:** A budget-friendly option where two students share a larger bedroom. This option is often preferred by students who wish to live with a friend.

Regardless of the room type, all accommodation fees include utility bills, high-speed internet access, and basic contents insurance.

SECTION 3: USE OF RESIDENTIAL FACILITIES Residents have access to a wide variety of communal facilities designed to enhance their living experience. Each hall of residence acts as a self-contained community with specific amenities provided for the exclusive use of its residents.

Common facilities available in most halls include:

- **Common Rooms:** Large social spaces equipped with televisions, sofas, and gaming consoles for relaxation and socializing.
- **Study Hubs:** Quiet zones with desks and power outlets, available 24 hours a day for students who prefer to work outside their rooms.
- **Laundry Rooms:** Coin or card-operated washing machines and dryers are located in the basement of every building.
- **Bike Storage:** Secure, covered areas are provided for students to store bicycles.

It is the collective responsibility of all residents to treat every facility with respect. Any damage caused to communal areas will result in a charge levied against the residents of that specific floor or block unless the individual responsible comes forward.

SECTION 4: MAINTENANCE AND HOUSEKEEPING To ensure that every facility remains in good working order, the university employs a dedicated facilities management team. While the university provides cleaning services for communal areas such as hallways, shared kitchens, and public bathrooms, it is the strict responsibility of the student to maintain the cleanliness of their own private room.

Procedures for reporting maintenance issues:

1. Identify the fault (e.g., a leaking tap, broken light, or heating failure).
2. Log in to the residential portal.
3. Submit a maintenance request form detailed with the location and nature of the problem.
4. Allow access for the maintenance crew, who generally respond within 24 to 48 hours for non-emergency repairs.

Regular inspections are conducted once per term to ensure that health and safety standards are being met and that the property is not being damaged.

SECTION 5: SAFETY AND SECURITY The safety of residents is the top priority. All halls of residence are equipped with electronic access control systems. Students must use their ID cards to enter the main building and their specific corridor. Tailgating, or allowing unknown persons to follow you into the building, is strictly prohibited.

Fire safety is taken extremely seriously. Every room is fitted with smoke detectors. The following items are banned from accommodation rooms to prevent fire hazards:

- Candles and incense sticks.

- Portable heaters or electric blankets.
- Halogen lamps.
- Cooking appliances (toasters, kettles, rice cookers) are only permitted in the designated kitchen areas, not in bedrooms.

Failure to comply with these safety regulations can lead to fines or eviction from university accommodation.
